

CASE REPORT PROGRAM

Field Orthopaedics is committed to supporting the continued improvement of clinical practice. We appreciate that this is best achieved through sharing lessons with each other within the orthopaedic community.

To enable this, Field have developed the Case Report Program which will only require up to 1 Hour of your time to have a Case Report prepared ready for publication. The team hopes that this approach will encourage the sharing of best practices by enabling you and your surgical team to continue to provide your expertise to our community.

The 4 step process to developing a case report with the FO Clinical team.

So you have a case that you would like to turn into a case report?

1. Take pre-operative, intra-operative, and post-operative doctor letters or notes, pictures and X-rays to utilise in the report and share with FO team.
2. Provide feedback on the draft of pre-operative and intra-operative portions of 'Case Synopsis'
3. Share Post-op follow up information with FO team.
4. Full draft will be provided for final approval

Case Report published!

Easy as that.

Please contact your local Field Orthopaedics distribution partner to find out more or email info@fieldorthopaedics.com
